

IARR DAILY CREW REPORT

Name of Module

DATE: 09/04/2015 TIME 1300 WORK DAY# 3

PERSON REPORTING: Jim Smalls, IARR PHONE: 540.336.7185 – located in New Meadows, ID
Ed Hunter, IARR (t) PHONE: 706.490.3515 – travelling to Challis, ID

CREW NAME & NUMBER (FIRST SHIFT DAY = WEDNESDAY, SEPTEMBER 2, 2015)

Crew#	Crew	Local Reference	CRWB	Phone	Assignment
C-27	NC-NCS-02	NC-ST	Brian Michaelson		Eleven Mile Fire
C-28	TN-TNC-04	TN-MA	Robert Lewis		Eleven Mile Fire
C-29	KY-JCC-01	KY-DBF	Fred Gilmore		Eleven Mile Fire
C-30	VA-NPS-01	VA-NPS	Alan Williams		Eleven Mile Fire
C-131	VA-VAST-01	VA-ST	Kevin Painter		TP Springs Fire

LOCATION & ASSIGNMENT OF CREWS

ELEVEN MILE – ID-SCF-015218

STATE: Idaho

ICP is located in Challis, ID; approximately 148 miles northwest of Idaho Falls, ID. Fires within the complex are located approximately 30 minutes west of Challis, ID. Kim Martin – assumed Incident Commander (IC), Mike Whalen – transitioned to Deputy IC, Diane Weaver – assumed Agency Administrator (AA), Robert Sanchez – transitioned to AA Rep.

Fire activity has subsided significantly due to a late night rain begging about 2:30am and lasting through the morning. As a result of the rain all crews are staged at the Challis Rodeo grounds, located approximately one mile south of Challis, ID. Weather is beginning to clear and there may be an opportunity for the crews to make it to Division K this afternoon.

Fire behavior will continue to be low the next two to three days as colder, wetter weather sets in with the likelihood of rain today and tomorrow. There is a potential of snow in the higher elevations (above 8000 ft.) the next couple of days. By Monday, another drying trend is expected with higher temperatures and drier atmospheric conditions.

Crew#	Crew	Fire	Acres	Division	START Shift	END Shift	Cell Service
C-27	NC-ST	Eleven Mile	10,077	K	ICP	ICP	Y
C-28	TN-MA	Eleven Mile	10,077	K	ICP	ICP	Y
C-29	KY-DBF	Eleven Mile	10,077	I	ICP	ICP	Y
C-30	VA-NPS	Eleven Mile	10,077	K	ICP	ICP	Y

TEPEE SPRINGS – ID-PAF-000192

STATE: Idaho

ICP is located in New Meadows, ID; approximately 12 miles northwest of McCall, ID near the Salmon River, and approximately 2.5 hours north of Boise, ID. Island Spike Camp is located on the edge of Riggins, ID. C. Ourada – IC, P. Broyles – Deputy IC, Kim Pierson – AA

Fuels consist of mixed conifer in elevations above 4500 ft and shrub and grass mix with stringers of ponderosa pine in lower slopes. Decadent lodge pole pine exists on the Nez Perce Forest portion of the fire. Most mixed conifer has experienced some level of beetle mortality. ERC's range from 90-97 percentile across the area. Fuels are drought stressed from three winters of low snowpack and are extremely receptive. The 100-hr and 1000-hr fuels are critically dry. Live fuels are also drought stressed and in some areas may be considered cured. 1

Fire behavior is expected to be low today due to weather – partly cloudy (40-50%) with a slight chance of showers (20%) and isolated thunderstorms are possible. Fire activity consists mostly of smoldering with some creeping and torching near concentrations of heavy fuels.

Due to rain two nights ago and through most of yesterday morning, VAST#1 crew staged at Island Spike Camp yesterday and is staged there again today. Temperatures will remain low with a high probability of rain tonight and possibly snow at higher elevations.
